--------------------------------	--------

Feeding instructions

Depending on the condition of the horse, one or two mouth syringes per day for at least one month, squeezed onto the horse's tongue.

Should be given after the light morning meal and before exercise.

Do not exceed recommended daily quantities.

Packaging

Carton containing 30 mouth syringes of 50 g net

Net weight

1.5 kg per carton

Anti-doping certificates

Each batch is officially certified by the LCH (following controls on final product, urine and blood) and can be used without risk.

LCH certificates are available on www.twydil.com (by entering the batch number).

It is the user's responsibility to check that the product complies with local regulations.

Storage and precautions

Store in original pack in a cool (not below 5 °C) and dry place. Minimum storage life (under proper storage conditions): until best before date shown on the mouth syringes.

Keep out of reach of children.
